Apod X

User guide

User guide

The Apod X is the perfect solution for team work, private conversations and creative collaborations. Designed for 2 to 4 people. Suitable for casual and formal meetings. The Apod X also provides soundproof space to really focus on your work. Ideal for individual work for long hours, video conferences and phone calls.

Good to know

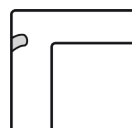

- If your Apod X has a desktop socket; you will be having a socket USB-A and USB-C. Here you can charge your phone and laptop.
- The occupancy indicator located on the corners of the pod, shows the availability of the Apod X (Red: Occupied, Green: Free) (optional)
- When you enter the Apod X, the movement sensor will automatically detects you and starts the fan. You can adjust the fan level with the ventilation button.
- Once you are inside; you can switch the light button. Adjust by holding the button to dim or increase the intensity of the light. You can save the setting for of the the light intensity for later by double clicking.
- If there is a fixed table inside the Apod X ; the height of the table is 74 cm in accordance with the international standards EN 527-1.
- If your Apod X has a media wall option, you can activate the face light and adjust it to the level you want. When you press the same button twice, you can save the light intensity you have determined.

Points to consider

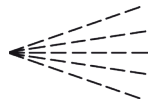

- Make sure the ventilation openings on the sides of the Apod X are not blocked from the outside. Keep 20 cm free space at a minimum.
- Do not plug in any appliances more than 220 VAC.
- Make sure that the Apod X is not plugged in before you open the access cover on top.
- Before moving the Apod X to relocate, always raise its feet off the ground and move it on wheels.
- Make sure the Apod X is positioned back on the feet when the relocation is complete.
- Keep the door closed all times.
- Do not leave your charger and laptop plugged.
- Do not smoke inside. Keep fire away.
